Geometric topology Wikipedia

February 19th, 2019 - History Geometric topology as an area distinct from algebraic topology may be said to have originated in the 1935 classification of lens spaces by Reidemeister torsion which required distinguishing spaces that are homotopy equivalent but not homeomorphic This was the origin of simple homotopy theory The use of the term geometric topology to describe these seems to have originated rather

Geometric Integration Theory Dover Books on Mathematics

February 8th, 2019 - Geared toward upper level undergraduates and graduate students this treatment of geometric integration theory consists of three parts an introduction to classical theory a postulational approach to general theory and a final section that continues the general study with Lebesgue theory

Measure mathematics Wikipedia

February 19th, 2019 - A measure space (X, \mathcal{F}, μ) is called finite if $\mu(X)$ is a finite real number rather than ∞ Nonzero finite measures are analogous to probability measures in the sense that any finite measure μ is proportional to the probability measure A measure μ is called σ -finite if X can be decomposed into a countable union of measurable sets of finite measure

Geometric Construction from Wolfram MathWorld

February 10th, 2019 - In antiquity geometric constructions of figures and lengths were restricted to the use of only a straightedge and compass or in Plato's case a compass only a technique now called a Mascheroni construction Although the term ruler is sometimes used instead of straightedge the Greek prescription prohibited markings that could be

used to make measurements

A geometric interpretation of the covariance matrix

February 18th, 2019 - Introduction In this article we provide an intuitive geometric interpretation of the covariance matrix by exploring the relation between linear transformations and the resulting data covariance

Constructions Introduction Drawing shapes with compasses

February 19th, 2019 - The word construction in geometry has a very specific meaning the drawing of geometric items such as lines and circles using only compasses and straightedge or ruler
